

Sachin S.S

Coimbatore, Tamil Nadu, India

Attended Sri Krishna College of Technology

Open to Software Engineer roles

Aspiring Software Engineer | DSA Enthusiast | MERN Trainee | Data Analytics | IoT Explorer

"Consistency compounds. Effort pays."

After 2 months of disciplined grinding, I have solved over **200 LeetCode problems** (primarily C++ and Java) along with **50 SQL problems**, sharpening my problem-solving and logic-building skills consistently. I am deeply thankful to **Shanmuga Raju sir** for his guidance in this journey, as I prepare systematically for internships and placements.

Education

Sri Krishna College of Technology

B.Tech (Pursuing)

Technical Skills

Languages: C++, Java, JavaScript, SQL

Frameworks: MERN Stack

Tools: Power BI, Node-RED, Figma

Areas: Data Analytics, Web & App Development, IoT

Platforms: LeetCode (200+ problems), GitHub

Projects & Competitions

1. MoviesFlix App Prototype (Web & App Development Competition)

Sri Krishna College of Technology

- Designed a Netflix-inspired app prototype using Figma with team "Solo Arisers."
- Developed multiple UI/UX pages, collaborating closely for seamless design execution.
- Enhanced skills in app design thinking and prototyping.

Certifications & Workshops

- **MERN Traineeship (Maiyyam):** Hands-on experience in data analysis and analytics tools. Mentors: Shreyas Kannan and Varun Sivachandran.
- **Data Analytics with MERN Certification (Maiyam platform):** Focus on Power BI data visualization and full-stack integration. Mentor: Revanth.
- **Raspberry Pi & Node-RED IoT Workshop (IIT Chennai):** Explored IoT projects under Sreeram Ravishankar, gaining hands-on IoT prototyping experience.

Achievements

- Solved 200+ LeetCode problems in C++ & Java, 50+ SQL challenges.
- Participated in app prototyping competitions, leading team UI/UX design.
- Completed MERN and Data Analytics certifications with practical projects.

Next Goals

- Systematic LeetCode streak for advanced problem-solving.
- Build deployable MERN projects integrating data analytics.
- Internship and placement readiness in software engineering roles.

Quote

"The best way to predict the future is to create it." — Creating mine, one problem at a time.
